ALD SERIES

Direct ringlights

Lighting systems to light from camera axis. They provide a huge quantity of light from a distant point so can be used to light objects from a further distance that those of use diffuse light.

Designed to stand out shadows, textures and edges.

Wiring for continuous mode

▶ Z1.3 - iBlueDrive inline

iBlueDrive inline is the driver for iBlueDrive technology integrated as a box of 65x33mm to the cable that goes from the lighting system to the connector. It is used when iBlueDrive driver can not be integrated on chassis. *See diagram:*
WARNING!: In continuous and powered mode, clamp driver to a metal surface for heat dissipation. In Strobe mode is not required, but recommended.
